PROBLEM STATEMENT 1

Digital Wealth Management

ॐ हिंदी mode built in — MITRA speaks your language

MITRA

My Intelligent Treasury & Robo Advisor — an avatar-led AI wealth advisor inside IDBI GO Mobile+, turning every customer's own transaction behaviour into timely, personal, explainable wealth guidance.

23

Working capabilities

100%

Offline, demo-proof

2

Languages — English / हिंदी

~2%

Of customers RMs reach today

01 – THE PROBLEM

Wealth advisory never reached 98% of customers.

01

Fragmented & inaccessible

Human relationship managers can only serve the top ~2% of customers — everyone else gets no advisory relationship at all, however much they save.

02

Data sitting idle

The bank already holds salary credits, spends, deposits and SIP behaviour for every account — but none of it is converted into advice today.

03

Generic, not personal

What customers get instead is generic product pushes — not the timely, personalized, data-driven guidance an RM would give an HNI client.

In our own synthetic profile for an average salaried IDBI customer, **₹25,125 sits idle every single month** — earning savings-account interest instead of compounding — simply because nobody ever said anything.

₹25,125

idle / month

02 — APPROACH & DIFFERENTIATORS

Not a chatbot bolted on. An advisory engine, worn as a friend.

Our approach: compute real advice deterministically from behavioural data first, use conversational AI only to phrase it — so every recommendation is explainable, auditable, and free to deliver at scale.

Fully offline, demo-proof

Onboarding → dashboard → nudge → avatar voice conversation → chart → executed SIP, end-to-end. Nothing on stage can break.

Computed, not canned

Every score, nudge, projection and recommendation is derived live from data. Change one input, and everything downstream changes with it.

Hybrid AI a regulated bank can ship

Deterministic, auditable advisory engine for the numbers; optional LLM only for open-ended phrasing, grounded in that same computed context.

Scales to every customer

Near-zero marginal cost per customer, in their own language — democratizing what an RM does today only for HNIs.

USP

The only wealth advisor priced at **zero marginal cost per customer** — because every recommendation comes from data the bank already has, not a headcount the bank has to hire.

03 — WHAT'S BUILT

23 capabilities, all working in the prototype today.

04

Conversational & Accessible

- Avatar conversation — speaks, listens, emotes
- हिंदी mode — voice + text
- MITRA Live Call — hands-free video call
- Human RM handoff with auto-brief

05

Insight Engine

- 360° behavioural insights
- Financial Health Score (0–100)
- Peer benchmarking percentiles
- Market Pulse → ₹ portfolio impact
- Money Persona — shareable card

08

Grow Wealth

- Wealth Time Machine (what-if sim)
- Round-Up investing (UPI spare change)
- Goal-based SIP planning
- Drift detection & glide-path rebalance
- Portfolio X-Ray (fees & overlap)
- LTCG harvesting
- Prepay vs. invest calculator
- Goal collision triage

03

Protect & Trust

- Fraud Shield — 5-point scam check
- Protection Gap — life cover adequacy
- Explainable AI — "Why this advice?"

03

Automate & Engage

- Money Rules — IFTTT for money
- Wealth XP gamification & levels
- Life events in Time Machine

04 – HOW IT WORKS

Data in. Explainable action out.

One continuous loop — from raw transaction data to a one-tap action the customer actually takes.

🔄 Every executed action becomes new behavioural data — the loop closes and re-scores automatically.

05 – WHO DOES WHAT

Two actors, one shared system of record.

06 – INFORMATION ARCHITECTURE

Five taps deep — the whole advisory experience.

A 4-question conversational onboarding hands off into a five-tab shell, with MITRA's avatar always one tap away.

07 — ARCHITECTURE

A hybrid architecture a regulated bank can ship.

Voice: Web Speech API (TTS + STT, en-IN & hi-IN) · Avatar: animated SVG with lip-sync & moods

08 — TECHNOLOGY

Built lean. Zero backend needed for the prototype.

LIVE TODAY — PROTOTYPE STACK

React 18 + Vite
Component UI & fast dev build

SVG Chart Engine
Hand-rolled — zero chart dependencies

Web Speech API
TTS + STT, en-IN / hi-IN

Animated SVG Avatar
Lip-sync & mood states

Anthropic Claude API
Optional, grounded phrasing layer

PRODUCTION ROADMAP STACK

RBI Account Aggregator
True 360° incl. other-bank assets

Bhashini
Neural TTS in 12 Indian languages

3D Avatar
MetaHuman / Ready Player Me

NPCI e-Mandates
Live MF / FD / SGB order APIs

Immutable Audit Log
SEBI IA guardrails & compliance

09 — INVESTMENT

What it costs, prototype to pan-India.

Illustrative, order-of-magnitude figures for planning discussion — not a vendor quote.

PHASE 0 • PROTOTYPE	PHASE 1 • PILOT	PHASE 2 • PAN-INDIA YR 1
₹0 Built for this hackathon — incremental spend React + Vite build Sweat equity Synthetic 360° dataset Sweat equity Web Speech API Free (browser) Claude API (optional) Pay-per-use	₹35L 90 days • 1 branch cluster • ~1L customers Engineering (3 FTE × 3 mo) ₹13.5L Account Aggregator + core banking integration ₹8L Cloud infra ₹3L LLM API usage ₹2.5L Bhashini voice licensing ₹1.5L SEBI IA compliance & audit setup ₹4L QA / security / pen-test ₹2.5L	₹3.8Cr Annual run-rate at full customer base Engineering scale-out (8–10 FTE) ₹1.2Cr Infra at scale ₹60L LLM + Bhashini at scale ₹85L Compliance, audit, RM training ₹40L Rollout & in-app onboarding push ₹50L Contingency (~8%) ₹25L

All figures are illustrative estimates for planning discussion, derived from the tech stack and roadmap above — not final vendor pricing.

10 — LIVE DEMO

Not mockups. A running product.

11 – WHAT'S NEXT

From hackathon prototype to production.

12 — THE ASK

Bank Aisa Dost Jaisa — digitised, for everyone.

MITRA is ready to pilot inside IDBI GO Mobile+ today — fully offline, fully explainable, and built to scale advisory to every customer, not just the top 2%.

WE'RE ASKING FOR

A pilot cohort inside IDBI GO Mobile+ to validate engagement & conversion on real (anonymised) customer data.

WHAT WE BRING

A working, demo-proof prototype — 23 capabilities, explainable by design, ready for compliance review.

NEXT 90 DAYS

Account Aggregator integration, SEBI IA guardrails, and a single-branch pilot rollout.
