MY INTELLIGENT TREASURY & ROBO ADVISOR

An avatar-based AI wealth advisor built to live inside **IDBI GO Mobile+** — speaking, listening and advising in nine Indian languages.

TEAM NAME

[add team name]

TEAM LEADER

[add team leader name]

PROBLEM STATEMENT

Track 1 — Wealth Advisory. Wealth guidance reaches only the customers a human relationship manager has time for. Make timely, personalised, data-driven advice available to every IDBI customer, in their own language, from data the bank already holds.

BRIEF ABOUT THE IDEA

“Bank Aisa Dost Jaisa”, digitised.

OPPORTUNITIES

Different, because of what we **refuse** to do.

FEATURES OFFERED • 1 OF 2

Understand → Grow → Protect → Act

Twenty-three platform capabilities, all working in the prototype. Change one number in the underlying data and every score, nudge, projection and recommendation below changes with it.

FEATURES OFFERED • 2 OF 2

Voice is the access mechanism, **not a garnish.**

PROCESS FLOW DIAGRAM

From raw ledger to defensible advice

WIREFRAMES / MOCK DIAGRAMS

Inside the GO Mobile+ shell

ARCHITECTURE • 1 OF 3 – SYSTEM

A deterministic spine with an **AI sidecar**

ARCHITECTURE • 2 OF 3 – SEQUENCE

Consent → statement → advice → receipt

ARCHITECTURE • 3 OF 3 – AWS DEPLOYMENT

Deployed in **ap-south-1**, and nowhere else

TECHNOLOGIES TO BE USED

Boring where it counts, sharp where it differentiates

ESTIMATED IMPLEMENTATION COST

A sandbox that costs less than one RM's **phone bill**

SNAPSHOTS OF THE PROTOTYPE

Every figure on these screens is computed, not written

PROTOTYPE PERFORMANCE & BENCHMARKING

Measured, and reproducible on your machine

SCOPE & INTEGRITY

What is real, and what we **refuse to claim**

A wealth advisor that overstates itself is a compliance incident waiting to happen. This is the boundary, stated the same way in the product, the repository and this deck.

ADDITIONAL DETAILS / FUTURE DEVELOPMENT

The path from prototype to production

IMPROVEMENTS DURING THE 2ND PROTOTYPE PHASE

From a convincing demo to a **defensible** one

The first prototype proved the idea. This phase replaced the parts that were only pretending to be real.

SUBMISSION LINKS

See it, run it, read it
